P/E Current: Price-to-Earnings is the current share price of a stock dividend by its earnings per share.

Price/Book: This ratio compares a stock's market value to its book value, calculated by dividing the current price of the stock by the latest quarter's book value per share.

Price/Sales: This ratio is a valuation ratio that compares a company's stock price to its revenues.

Price/Cash Flow: This ratio measures the value of a stock's price relative to its operating cash flow per share.

Active Share: This tracks the disparity between a portfolio manager's holdings and that of a benchmark index.

Impact Metrics

Investors are advised to carefully consider the investment objectives, risks, and charges and expenses of the fund before investing. The prospectus contains this and other information about the fund, and we advise reading carefully before investing. Investors may obtain a copy of the prospectus at www.niaimpactfunds.com or by calling (833) 571-2833.

Important Information:
 Carbon Intensity: We use the weighted average carbon intensity method to determine the portfolio's carbon footprint. We calculate the total scope 1+2+3 emissions weighted by per million dollars of company revenue for each company. This number is multiplied by the weight assigned to the company within the portfolio to give us the weighted average carbon intensity per holding. The graph displays this measure at the portfolio aggregate level in comparison to the index.

The MSCI ACWI IMI captures large, mid and small cap representation across 23 Developed Markets and 24 Emerging Markets countries. With 8,799 constituents, the index is comprehensive, covering approximately 99% of the global equity investment opportunity set. Unlike mutual funds, the index does not incur expenses. If expenses were deducted, the actual returns of this index would be lower. As with any mutual fund investment, there is a risk that you could lose money by investing in the Fund. The success of the Fund's investment strategy depends largely upon the Adviser's skill in selecting securities for purchase and sale by the Fund and there is no assurance that the Fund will achieve its investment objective.

The Fund's incorporation of ESG considerations in its investment process may cause it to make different investments than funds that have a similar investment universe and/or investment style but that do not incorporate such considerations in their strategy or investment processes. Under certain economic conditions, this could cause the Fund's investment performance to be worse or better than similar funds that do not incorporate such considerations in their investment strategies or processes. In applying ESG criteria to its investment decisions, the Fund may forgo higher-yielding investments that it would invest in absent the application of its ESG investing criteria.

Nia Impact Solutions Fund is distributed by Ultimus Fund Distributors, LLC (Member FINRA). Ultimus Fund Distributors, LLC and Nia Impact Capital are separate and unaffiliated.
